The Foster Care Auxiliary has had a huge impact in my family. We took in three children from the foster care system to join our already large family. When we needed help with clothes, household items and a stroller the Foster Care Auxiliary was there for us. But the biggest part was the emotional support we felt from the group. We had so many questions and concerns as to what we should be doing to better help the children in our care. Every step of the way the Foster Care auxiliary has been there for us as we built a forever family for the special children in our home.

I have seen the changes that people have had in their lives from the help they received from this wonderful agency. I enjoy volunteering and giving to this organization. It has helped out so many foster youth and continues to be a great place to gain resources and awesome things for these children that are often forgotten. I would hope that more people could be aware of the place and help it grow. It is an awesome resource...

Hi Kathy,

I have enjoyed volunteering for the Foster Care Auxiliary in the past. Unfortunately I can no longer help as I have moved to the state of Utah.

Because of organizations like yours, my daughter and I have been enriched with meeting wonderful people and experiences that will leave lasting memories. My daughter has just graduated from Gonzaga University. She continued her volunteer activities throughout her college years and plans on continuing throughout her work years.

Best wishes to the Foster Care Auxiliary. You have made a difference in our lives!
